

TRAINING

Dominium University is our own customized training department with courses written specifically for Dominium employees by Dominium instructors. DU provides our employees with valuable resources and courses to expand their skills and gain a competitive edge in their real estate market. Whether the need is for courses in the college of management, marketing, or maintenance, DU offers training for all skill levels.

Dominium has three areas our training classes focus on:

1. Management
2. Marketing
3. Maintenance

We offer several training classes aimed at introducing the Property Management professional to Dominium's high standards, and showing our employees ways to achieve those standards.

All of the Dominium University classes are designed to train not only the new professionals to the field, but seasoned professionals just joining Dominium, so that we can continue to maintain the consistency, professionalism and high standards that our owners and clients have come to expect from the Dominium brand.

We have a comprehensive orientation program for Community Managers new to Dominium. It is a week-long program aimed at acclimating new Community Managers to Dominium's expectations and responsibilities.

Finding your competitive edge: In the property management field, it all comes down to your marketing and leasing plans. We have several classes aimed at helping our employees to meet their community's leasing goals.

As you can see, regardless of what your needs are, DU has a class for you!
